ROLLER GARAGE DOORS BY GLIDEROL

SPACE-SAVING, SAFE AND MADE-TO-MEASURE

For over 3 decades GLIDEROL have been manufacturing quality and reliable roller garage doors in the UK. Made from the very best components, equipped with state-of-the-art technology, safety features and equipment, the doors require little maintenance and are a safe investment.

GLIDEROL garage doors travel vertically and provide more clearance inside and outside of the garage when compared to conventional up-and-over, as well as sectional and swing doors. The doors can be opened conveniently even with the car parked directly in front or behind it.

Why choose Gliderol Roller Doors?

Gliderol's Roller Garage Doors have been designed and manufactured in the UK for over 35 Years from strong, corrosion protected steel and are made to suit most garage openings, adding style and character to any home.

In addition to being built to operate with minimal noise and friction, Gliderol Roller Doors are specifically designed with a reinforced bottom rail to protect your home against intruders.

Safety

Anti-lift device, automatic obstacle detection and safety catch all inclusive.

Stability

Boxes and profiles made out of non-corroding material – robust, durable, low-maintenance and recyclable.

True to size

All doors are manufactured in line with individual needs and made-to-measure.

Made in the UK

Fully CE compliant and manufactured within audited ISO 9001 quality systems.

Easy care and low-maintenance

No expensive painting, easy to clean.

For large surfaces

Up to 5m wide and 4.9m high.

Gliderol Roller Door

Gliderol Roller Door Mini

Easy to Operate

Easy to open and close with minimum noise and friction giving reliable performance at all times.

Weatherseal

Durable bottom seal on the underside of the door prevents leaves and other undesirable materials entering your garage from outside.

Security

Unique profile and aluminium bottom rail reinforce our roller doors against intruder penetration.

Locking

The double-sided locking system is operated from the central handle and locks from both the inside and outside of the door. No lock is supplied on automatic doors.

Minimal Maintenance

No oiling or greasing, just an occasional clean of the guides with white spirit and the door surface with warm soapy water.

Space Saving

Rolls up vertically and does not swing out in front of the garage. You can park right up to the door and have more storage space in the roof of the garage.

EASY TO OPERATE

SAFE

Gliderol Roller doors can be fitted with easy to use, state-of-the-art drive technology allowing the door to be opened or closed by means of a compact hand transmitter or wall mounted control box.

Emergency release

For doors without any other entrance door, there is a lockable emergency release to be operated from outside.

Safety

The door reverses automatically should the downward movement of the door be restricted.

Security

The risk of another handset using the same code is eliminated as the transmitter uses a different code from one of two billion after every operation.

Quiet Operation

Noise is reduced as the motor is housed entirely within the roll of the door giving a quiet and smooth performance.

Automatic Light

Lights your garage for up to 90 seconds after the motor is activated allowing you to drive into an illuminated garage.

Available Colours Are:

Colours and laminate finishes shown are limited by the printing process.
Steel swatches are available on request.

White | BS00E55

Black | BS00E53

Vandyke Brown | BS08B29

Burgundy | BS04D45

Zincalume | No Paint Finish

Golden Oak* | Laminate Finish

Rosewood/Mahogany* | Laminate Finish

* Laminate finish. The colours are printed and may not match exactly. Steel colour swatches are available.

Technical Information

Gildermatic doors require an extra 20mm side clearance on the side the drive unit is required to be fitted.

SERIES A (Hand Operated)	DIMENSION PANEL (minimum sizes) mm						
	Side Room		Head Room	A	B	C	D
	Resid.A	Resid.AA					
2100 HIGH	75	100	430	25-100	500	150	280
2400 HIGH	75	100	450	25-100	540	160	290
2700 HIGH	75	100	450	25-100	540	160	290
3000 HIGH	75	100	470	25-100	560	170	300
Mini ROLL 2100 HIGH	75	-	340	25-100	420	150	190

If recommended headroom is not available the door may still be installed, required headroom should be maintained (n.b. some loss of opening height will occur and the roll of the door will be visible, but this may be disguised by a fascia).

Sizes - Up to 5 metres wide and 3 metres high (up to 4.9 metres for B-series – ask for details). Requires no frame so enables the maximum possible opening width for the wider vehicle. Door sits behind the brickwork so can be fitted in arched and unusual garage door openings.

Windlock system - should be specified for double doors in very exposed locations and greater side room clearance is required. For advice and information, speak to our technical department or your supplier.

Converting to automatic - whilst manual doors can be easily converted to automatic later, there is a significant cost saving if the unit is factory-fitted at the outset.

Guarantees - so long as the door is correctly installed and reasonably maintained, 2 years electrical, 6 years mechanical and 10 years on the door finish. CE tested and approved. Ask for details.

GLIDEROL GARAGE AND INDUSTRIAL DOORS LTD.

QUALITY PRODUCTS MADE IN THE UK

GLIDEROL is one of the leading UK manufacturers of garage and industrial door systems.
