Final decor coating with high-strength protective paint

The highly scratch-resistant and UV-resistant decor printing guarantees a permanently beautiful door appearance.

The 24 decors are detailed, natural and colourfast.

A harmonious, vibrant surface finish look is created by repeating the decor every 800 to 1300 mm (depending on the decor) and by offsetting the decor between the sections.

Duragrain doors are generally supplied in Grey white, RAL 9002, on the inside of the door. When the door is opened, a thin Grey white stripe can be seen between the sections on the outside.

Side frames and fascia panels are delivered in Woodgrain, Traffic white RAL 9016, as standard. Optionally, fascia panel and frame cladding are available in an NCS colour matching the decor (see colour stripes with designation on the decor details pages from page 4) or in an individually selected RAL colour.

Decor detail view

- 1 Decor
- 2 Colour of optional fascia panel and frame cladding

Note

The colours and surface finishes shown are subject to the limitations of the printing process and cannot be regarded as binding. Please consult with your local Hörmann specialised dealer.

Duragrain
Extremely scratch-resistant

Door leaf design

- 1 42 mm thick, double-skinned LPU steel sections with PU infill
- 2 Surface finish hot-galvanized on the interior and exterior
- 3 Sections primed on the interior and exterior in Grey white, RAL 9002
- 4 UV-resistant decor printing on the priming of the outside of the sections ensures a natural, colourfast decor appearance
- 5 The scratch-resistant final Duragrain coating provides the exterior of the decor with continuous protection against environmental effects, keeping the door beautiful for years to come
